# Ideation process

# Introduction

This progress presentation is part of the Advanced Web Programming Course.

We're asked to implement a full stack website for an idea of our choice.

The website is to be:

- Responsive
- Efficient and useful
- Professional

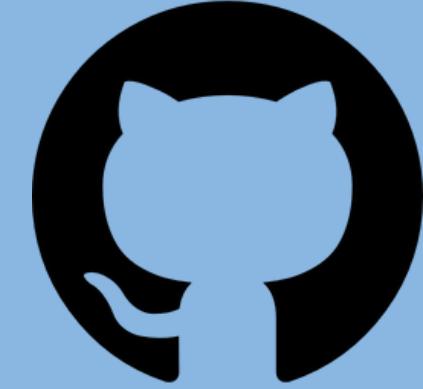

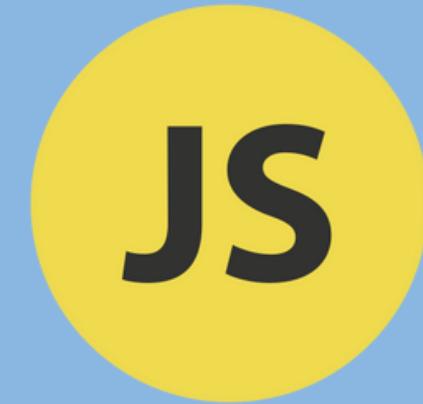

# Origin of the creative idea

Who doesn't wear shoes!

As developers we want to break into the world of E-commerce which holds 40% of the world wide web and 16% of the world's total sales. We choose shoes which are the most likely product a customer will think of buying according to some psychologists!

# Tech Stack

# Show Case

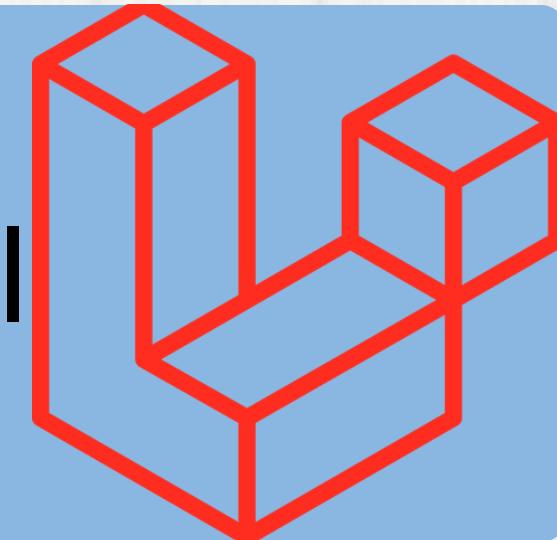

# Project

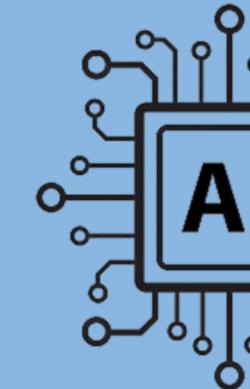

# Project Future Work

"Perfection is unattainable, but growth is always possible." ~ 'Tbh i made this up'

01. Laravel

02. AI Features

03. Integrating  
REST API

**Thank you  
very much!**
